## COMPLETE REPAIR MANUAL

The complete Repair Manual consists of two volumes:

- MH City - MH Plus - MH 5.6  
Repair Manual "Wheel Excavators"
- MH City - MH Plus - MH 5.6  
Repair Manual "Engine"

The Repair Manuals for "Wheel Excavators" and "Engine" contain the necessary technical information to carry out service and repair on machine and on engine, necessary tools to carry out those operations and information on service standard, on procedures for connection, disconnection, disassembly and assembly of parts.

The Repair Manual which covers the models MH City - MH Plus - MH 5.6 consists of the following volumes, which can be identified through their print number as stated below:

| VOLUME                           | MACHINE TYPE               | PRINT NUMBER |
|----------------------------------|----------------------------|--------------|
| Repair Manual "Wheel Excavators" | MH City - MH Plus - MH 5.6 | 87677413A    |
| Repair Manual - "Engine"         | MH City                    | 87659057A    |
|                                  | MH Plus - MH 5.6           | 87704086A    |

## TO PREVENT ACCIDENTS

The majority of accidents and injuries which occur in industry, at home or on the road, are caused by the failure of some individual to follow simple and fundamental safety rules or precautions. For this reason **MOST ACCIDENTS CAN BE PREVENTED** by recognizing the real cause and taking the necessary precautions, before the accident occurs.

Regardless of the care used in design and construction of any type of equipment, there may be conditions that cannot be completely safeguarded against, without interfering with reasonable accessibility and efficient operation.

A careful operator and / or technician is the best insurance against accidents. The complete observance of one simple rule would prevent many thousands of serious injuries each year.

This rule is: never attempt to clean, lubricate or adjust a machine while it is in motion.

---

### **WARNING**

Before carrying out any maintenance operation, adjustment and or repair on machines equipped with attachments, controlled hydraulically or mechanically, make sure that the attachment is lowered and safely set on the ground. If it is necessary to have the equipment partially or fully raised to gain access to certain items, be sure the equipment is suitably supported by means other than the hydraulic lift cylinders, cable and /or mechanical device used for controlling the equipment.
